

URSANAV NEWS RELEASE

URSA NAVIGATION SOLUTIONS AND NAUTEL ANNOUNCE GLOBAL DISTRIBUTION AND INTEGRATION ALLIANCE

Concerned about GNSS vulnerabilities? Considering a land-based alternative or backup to GNSS? Replacing or upgrading your existing Loran system? Moving to eLoran? Need deployable or tactical Loran? Consider a 21st century solution to your Position, Navigation, and Timing requirements.

May 15, 2008 - FOR IMMEDIATE RELEASE

Chesapeake, VA - Ursa Navigation Solutions (UrsaNav) is pleased to announce an alliance with Nautel to provide full-service Enhanced Loran (eLoran) solutions, including systems engineering, integration, and follow-on support. UrsaNav lends its significant Loran operations, engineering, and management expertise to the alliance. Nautel will continue to concentrate on developing revolutionary Enhanced Loran Transmitter Systems.

According to Chuck Schue, UrsaNav's President & CEO: "The world relies too heavily on Global Navigation Satellite Systems (GNSS) such as GPS for position, navigation, and timing service. In the event of a GPS outage or disruption, eLoran has time and again been acknowledged as the best fully independent system to provide continuity of these services to all modes: land, air, and sea. With the introduction of the Nautel eLoran Transmitter technology, the cost of a system to mitigate the safety, security, or economic effects of a GNSS system outage or disruption is significantly decreased. Our technology toolbox is now complete. We can deliver a more capable and flexible eLoran solution, with exceptional associated reductions in installation, maintenance, infrastructure, and follow-on support, all at a tremendous cost savings to the service provider."

About UrsaNav. Ursa Navigation Solutions (www.ursanav.com) provides specialized products and engineering and IT solutions for critical infrastructure protection; legacy system transformation; radio, radar, and inertial navigation systems; and C4ISR. UrsaNav's personnel have been involved in every major technological advance in the U.S. Loran system since 1969.

About Nautel. Nautel (www.nautel.com) is a global leader in the design, manufacture, sales and support of high power Radio Frequency ("RF") products for AM and FM broadcast, navigation, industrial and space-based applications. With a long history of creating highly innovative products, Nautel continues to lead the way in providing valuable new solutions for the digital radio broadcast revolution.
